PROFESSIONAL SUMMARY

Information Technology graduate with practical experience in mainframe development and full-stack web programming. Wrote standard COBOL programs for z/OS environments. Built secure web applications using customized server logic to resolve practical business requirements.

SKILLS

- **Languages:** Java, JavaScript, TypeScript, HTML5, CSS3, SQL, PostgreSQL, COBOL, JCL
- **Frameworks & Libraries:** Spring Boot, Hibernate, ReactJS, NextJS, ExpressJS, TailwindCSS
- **Tools & Platforms:** Git/GitHub, Supabase, Docker, Vercel, Render, z/OS, ISPF, Prisma

EXPERIENCE

Land Bank of the Philippines (HO), COBOL Developer Intern *February 2026 – April 2026*
Malate, Manila, Philippines

- Successfully developed 13 COBOL programs for z/OS mainframe computing environment
- Gained hands-on experience in a mainframe environment (z/VSE), including developing COBOL programs from scratch, performing compilation and JCL job submission, and monitoring job execution and status
- Verified all COBOL programs for compliance with IBM z/OS coding standards to ensure seamless enterprise integration

Salesforce, Salesforce Developer Trainee *March 2025 – May 2025*
Philippines, Remote

- Completed 22 superbadges on Salesforce Trailhead, reflecting hands-on experience in CRM concepts, security models, workflow automation, and scalable system design, simulating real-world scenarios on utilizing Salesforce technologies
- Utilized Apex, Flow, and LWC to develop apps, integrate APIs, and query data with SOQL

Bulacan State University, Student Assistant *January 2025 – May 2025*
Malolos, Bulacan, Philippines

- Managed front desk operations and document handling, ensuring efficient communication between university offices while maintaining high service standards for student inquiries
- Provided technical consultation to faculty on emerging software tools and performed diagnostic troubleshooting to maintain hardware system availability.

PROJECTS

STC Performing Arts Center Website, Full stack Developer

- Integrated PayMongo API to automate payment processing and secure transactions
- Developed a dynamic administrative dashboard using TanStack Start and Supabase for real-time facility management
- Created an automated booking system that synchronizes class availability and coach schedules across the platform

BulSU OSAS Complaint and Grievance Portal, Full stack Developer

- Developed secure server-side logic APIs to manage sensitive data fetching and student records
- Built a customized grievance workflow to automate Bulacan State University protocols and ensure strict procedural compliance
- Designed the landing page and user interface to improve accessibility and student engagement
- Created a real time tracking system for administrators to monitor, categorize, and resolve student concerns

CERTIFICATES

- Learn Intermediate Java, *Codecademy* *April 2026*
- IBM Mainframe Developer, *IBM* *March 2026*
- Salesforce Virtual Internship Program – Philippines *May 2025*

EDUCATION

Bulacan State University Malolos, BSIT *August 2022 – June 2026*
