PROFESSIONAL SUMMARY

IT graduate and versatile web developer with a strong foundation in both enterprise mainframe environments and modern web frameworks. Experienced in engineering secure full-stack applications using customized server logic and modular code design to optimize performance and reusability.

SKILLS

- **Languages:** Java, COBOL, JavaScript, TypeScript, HTML, CSS, SQL, PostgreSQL, JCL
- **Frameworks:** Spring Boot, ReactJS, NextJS, ExpressJS, TailwindCSS, NodeJS
- **Other:** Git/GitHub, REST API, Docker, Vercel, Render, z/OS, ISPF, Prisma, Agile

EXPERIENCE

Land Bank of the Philippines (HO)

COBOL Developer Intern

February 2026 – April 2026

Malate, Manila, Philippines

- Contributed to the development and migration of 13 COBOL programs to z/OS mainframe environment that is a part of the modernization project to increase data processing speed
- Worked with PS and VSAM input files to handle data reading, validation, and processing logic
- Executed JCL job submissions and monitored execution status to maintain system reliability
- Performed unit testing and ensured the programs complied with IBM z/OS coding standards to ensure seamless enterprise integration

Bulacan State University

Institutional Student Assistant

January 2025 – May 2025

Malolos, Bulacan, Philippines

- Managed front desk operations and document handling, ensuring efficient communication between university offices while maintaining high service standards for student inquiries
- Provided technical consultation to faculty on emerging software tools and performed diagnostic troubleshooting to maintain hardware system availability

PROJECTS

EntityForge | Front-end Developer

July 2026 - Present

- Developed a browser-based visual database designer with a drag-and-drop workspace to automatically synchronize JPA models with generated SQL and eliminate manual coding errors

QuickRoute Web | Full Stack Developer

April 2026 – June 2026

- Developed a Spring Boot mock server backend that converts JSON definitions into live REST API endpoints to accelerate frontend prototyping independent of backend readiness
- Built configurable response delays and HTTP status codes to simulate real-world server conditions and improve the reliability of frontend error testing

STCPAC Website | Full Stack Developer

September 2025 - December 2025

- Developed a dynamic administrative dashboard using TanStack Start and Supabase to seamlessly query class and instructor data and prevent studio booking conflicts
- Integrated PayMongo API to automate payment processing and secure transactions

OSAS Complaint and Grievance Portal | Full Stack Developer

January 2025 - August 2025

- Built a customized grievance workflow to automate Bulacan State University protocols and ensure strict procedural compliance
- Developed secure server-side logic APIs to manage sensitive data fetching and prevent unauthorized access to confidential student records
- Designed the landing page and user interface using React.js to improve accessibility, transparency and student engagement

CERTIFICATES

- **Java Developer** | DataCamp June 2026
- **IBM z/OS Mainframe Practitioner** | IBM May 2026
- **IBM Mainframe Developer** | IBM March 2026

EDUCATION

Bulacan State University Main | BS in Information Technology

August 2022 – June 2026
