

Darl Ellison G. Floresca

+63 962 983 7530
floresca.darrellisong@gmail.com
linkedin.com/in/darlffloresca

OBJECTIVE

To build foundational skills and grow within the field. Progress into full-stack or cloud engineering roles by mastering modern tools, problem-solving, and system architecture, ultimately leading technical projects and mentoring others while continuously evolving with the demands of the tech industry.

SKILLS

- **Languages:** JavaScript, TypeScript, Java, HTML5, CSS3, SQL, PostgreSQL, Cobol
- **Frameworks & Libraries:** ReactJS, NextJS, ExpressJS, Tailwind CSS, Zustand, Tanstack
- **Tools & Platforms:** Git/GitHub, Supabase, VS Code, Vercel, Render, Gemini CLI, Prisma

EXPERIENCE

Landbank of the Philippines, Cobol Developer Intern

February 2026 - Present

- Develop COBOL programs for mainframe computing environments. Focus on writing clean, efficient code for financial data processing. Ensure system reliability through comprehensive testing and debugging

Salesforce Virtual Internship Program, Remote Intern

March 2025 – May 2025

- Built automation solutions on Salesforce including order confirmations, loyalty tiers, stock alerts, and bulk updates
- Used Apex, Flow, and LWC to develop apps, integrate APIs, and query data with SOQL
- Designed dashboards for insights and documented workflows for scalability

Bulacan State University - CSER, Student Assistant

January 2025 – May 2025

- Managed front desk operations and document handling, ensuring efficient communication between university offices while maintaining high service standards for student inquiries

PROJECTS

STC Performing Arts Center Website

- Built a centralized management platform using NextJS, replacing manual scheduling with a digital system for classes, coaches, and studio rentals
- Enabled secure, automated transactions by integrating PayMongo, allowing users to pay for classes and rentals directly through the website
- Designed an administrative dashboard for easy management of coach rosters and class availability

BulSU OSAS Complaint and Grievance Portal

- Enabled administrators to monitor, categorize, and resolve student concerns in real time enhancing transparency and accountability
- Improved operational efficiency by digitizing submissions and centralizing records using ReactJS, reducing processing delays and accelerating response time
- Leveraged GitHub for version control and collaborative development, ensuring organized code management and efficient tracking of feature updates

CERTIFICATES

- Network Addressing and Basic Troubleshooting - Cisco February 2024
- Salesforce Virtual Internship Program – Philippines May 2025

EDUCATION

Bulacan State University Malolos

Bachelor of Science in Information Technology
August 2022 - Present
