## EXPERIENCE

### Accenture Philippines

Custom Software Engineer

**Aug 2026 - Present**

National Capital Region, Philippines

- Develop custom software solutions to design, code, and enhance components across systems or applications. Use modern frameworks and agile practices to deliver scalable, high-performing solutions tailored to specific business needs

### Land Bank of the Philippines (HO)

COBOL Developer Intern

**Feb 2026 – Apr 2026**

Malate, Manila, Philippines

- Developed and migrated 10+ COBOL programs to a z/OS environment to modernize infrastructure and increase data processing speed
- Processed PS and VSAM files to streamline data validation and improve overall execution logic
- Executed JCL job submissions and monitored execution status to maintain high system reliability

## SKILLS

**Languages:** Java, COBOL, JavaScript, TypeScript, HTML, CSS, SQL, PostgreSQL, JCL, Python

**Frameworks:** Spring Boot, Tanstack, NextJS, ExpressJS, TailwindCSS, NodeJS, Fast API, LangGraph

**Other:** ReactJS, Git/GitHub, OpenAI, REST API, Docker, Render, z/OS, ISPF, Prisma, Agile, Gemini

## PROJECTS

**EntityForge:** A browser-based visual database designer with a drag-and-drop workspace to automatically synchronize JPA models with generated SQL and eliminate manual coding errors

**QuickRoute Web:** A Spring Boot mock server converting JSON into live REST APIs to accelerate frontend prototyping with response delays and HTTP status codes to simulate network conditions and improve error testing

**Code3270:** Built an interactive e-learning platform that modernizes the experience of writing and validating COBOL and JCL through an integrated in-browser workspace

**STCPAC Portal:** Built an admin dashboard using TanStack Start and Supabase to query schedules and prevent booking conflicts. Integrated the PayMongo API to automate payment workflows and secure platform transactions

**OSAS Complaint and Grievance Portal (Capstone):** Engineered secure server-side APIs to prevent unauthorized access to student records while automating grievance workflows and designing a responsive React.js UI to ensure strict procedural compliance and improve student engagement

## ACTIVITIES

**IBM AI Builders Challenge (August Wildcard Edition):** Built MergeMasterAI, an autonomous AI DevOps agent using LangGraph and FastAPI that orchestrates GitHub PR workflows, routes human reviewers, and automatically pushes code remediations for vulnerabilities

**HackerRank Orchestrate 24-hour Hackathon (August Edition):** Placed 401<sup>st</sup> out of 1983 contestants where I engineered a multimodal WhatsApp notification agent leveraging Google Gemini 3.5 Flash-Lite, Pandas, and Pydantic to dynamic-route multimodal messages (text, vision, audio) into notify, digest, or mute buckets.

**IBM AI Builders Challenge (July Edition):** Collaborated alongside 2 AI Engineers to build PlotWeaverAI, infinite node-based canvas using IBM Bob, successfully helping authors visually organize complex narrative pathways and integrated an AI-powered companion using IBM watsonx to automatically detect downstream logic breaks and suggest modular alternatives to maintain narrative consistency

## CERTIFICATES

**DataCamp** – Associate AI Engineer for Developers | Java Developer

**IBM** - IBM Mainframe Developer | IBM z/OS Mainframe Practitioner

## EDUCATION

**Bulacan State University (Malolos Campus)**

Bachelor of Science in Information Technology

**Aug 2022 – Jun 2026**

Web and Mobile Application Development
